DETAILED ACTION

Drawings

Figures 24-46 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1 and 2 (and therefore dependent claims 3-14) are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Specifically regarding claims 1 and 2, the distances L1, L2, L11, L21, L1n, and L2n are not clearly defined by the specification or the drawings. Regarding the definitions of the distances L1 and L2, the specification and drawings do not clearly define where the measurements of these distances are taken “from and to” and along which axis the measurements are taken. It is also unclear as to where the distances of the “longest” and “shortest” distances along the reference axis of the first optical system are taken “from and to” in these definitions. Regarding the definitions of L11, L21, L1n, and L2n, the specification and drawings do not clearly define where the measurements of distance are taken “from and to” and along which axis the measurements are taken.

Art Unit: 2873

Claims 3-14 are rejected because they inherit the indefiniteness of the claims from which they depend.

Examiner's Comment

A proper search could not be made to determine the patentability of the invention, since the subject matter in the independent claim was unclear to the examiner and an assumed meaning could not be determined.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jessica T Stultz whose telephone number is (703) 305-6106. The examiner can normally be reached on M-Th 7:30-5, and alternate Fridays.
